EDUCATION

Bachelor of Engineering – Software Engineering

Carleton University

Sep 2021 – Jun 2025

Ottawa, ON, Canada

Awards: Marie Clay Memorial Award, Dean's List, Faculty of Eng. Scholarship, 2021 Entrance Scholarship

WORK EXPERIENCE

Web Developer

Carleton University

Mar 2025 – Nov 2025

Remote

- Built WordPress sites using Elementor and Astra, designing effective CTAs to increase course registrations.
- Translated **Adobe Photoshop** designs into a production-ready webpage with cross-device compatibility.
- Optimized sites for **SEO, accessibility, and performance**, increasing **website visitors by 25%** and resulting in **40+ new newsletter subscriptions in 4 months**.

Student Engineer - Co-op

Environment and Climate Change Canada

May 2024 – Aug 2024

Gatineau, QC, Canada

- Developed a **VBA JSON converter** to migrate environmental reporting data from **XML** to **UNFCCC-compliant JSON**, delivering a production-ready tool **within 4 months**.
- Conducted **data verification** and **QC testing**, enhancing QC processes using **Power BI**.
- Automated CRT variable UID mapping using JSON parsing, **Power Query**, and **SQL**, creating **reusable workflows and team documentation**.

Teaching Assistant

Carleton University

Jan 2024 – Dec 2024

Ottawa, ON, Canada

- Supported **200+ students** in **C/C++** and **Python programming labs**, guided students in development of a **Linux Kernel OS Simulator** and provided **50+ hours** of technical support during office hours and labs.

Test Developer - Co-op

D2L Corporation

May 2023 – Aug 2023

Remote

- Executed manual, exploratory, and regression UI tests; validated workflows using **Playwright** and tracked defects using **Jira**.
- Performed **end-to-end EDDS testing** by verifying BEF events, dataset records, and SQL entries using **SSMS** to ensure 100% event-to-database consistency.
- Led **WCAG 2.2 accessibility testing** using **NVDA** and reporting violations, resulting in **full compliance**.

PROJECTS

AI Automated Testing Framework | Python, Cadmium, OpenAI API, PyCharm | [Source Code](#) April 2025

- Developed an AI-driven testing framework using Cadmium and Python to perform black-box integration testing on DEVS models, leveraging ChatGPT for automated test case generation.

Mini Shopify | Java, SpringBoot, PostgreSQL, Redis, Azure deployment | [Source Code](#) Dec 2024

- Developed and deployed a Java Spring Boot mini-Shopify platform on Microsoft Azure, utilizing GitHub Actions for CI/CD, with dynamic product management, secure merchant login, and real-time SPA updates.

SKILLS

Programming Languages | Python, JavaScript, TypeScript, Java, C/C++, C#, HTML5/CSS, PHP, SQL, VBA

Frameworks | React, NestJS, Spring Boot, Ruby on Rails, Node.js, Express.js, Vite, WordPress

Databases | MySQL, PostgreSQL, MongoDB, Redis, Prisma

Developer Tools | Git, Docker, Azure, Jenkins, Jira, Visual Studio Code, PyCharm, Eclipse, IntelliJ

Languages | English (Fluent), Arabic (Fluent)
